We Think Your Way

Euro-200 is a skilful helper with everything you expect. High-performance, flexible till with outstanding communication skills at low cost. Good retailers think about their future. Thus, Euro-200 already at present fully supports payments in Euro and changeover to new European currency. These characteristics make Euro-200 useful in wide range of retail outlets – from groceries, drug stores, convenience stores through bigger counter store as clothes or shoe shops to middle-sized supermarkets.

Your Ideas Are Worth Satisfied Customers

Design of Euro-200 comes out from best retailers' experiences. Hence, it is equipped with pop-up rotary customer display. The blue back lighted display has higher contrast for easier readability. Moreover you can take full advantage of handy programmable keyboard for speeding up service or various consumer campaigns. Unique feature of all new Elcom brand tills is built-in UV LED bank notes checker that has immediately become favourite among retailers. Stylish design has obtained favourable responses since it naturally represents even more exclusive outlets.

Modern And All-inclusive

This state-of-the-art till is remarkable for its adjustability and rich capabilities. It is ready to meet demanding needs of modern retailers for easy and fast work with large sales data. It provides comprehensive information that will help you to take a good decision. You can streamline your business with Euro-200 more easily because it presents accurate stock summary and allows comfort data interchange with PC via USB or serial port. Networking or connection of useful devices as a bar code scanner, an external programmable keyboard or digital scale will rest only with you...
