Optional accessories	battery box, cash drawer, digital scales, bar-code scanner, payment terminal, external keyboard, PC keyboard, backlight		

The EURO-500 Handy belongs to a family of portable cash register. Its advantages are its particularly light weight and compact dimensions. The Euro-500 Handy is designed especially for smaller stores and selling in stalls. It can be easily transported from one sales area to another and easily moved to areas as a substitute cash register in case of power failure. In spite of its small dimensions, it is very well equipped technically and offers great flexibility, with connectivity to many peripheral devices. The EURO-500 Handy also provides interesting and important managerial functions and financial reports. The possibility of using a computer reduces the cash register's programming and handling time and simplifies work.
